Multiple Spring Mechanical Seals

Mechanical Seals for Pump shafts provide the best possible seal for a rotating shaft. These extremely durable designs have been sealing pumps for decades.

When ordering your seal, do not forget to order the stationary seat to go with it.

ASP Type 8 Seals

Our ASP Type 8's are durable seals made to perform in most types of rotary shaft equipment. Their design features a reliable o-ring secondary seal available in different elastomer compounds to accomidate a wide range of servives from oil to water, hydrocarbons to acids, etc. Thease seals have a set screw to provide a positive connetion between seal and shaft. Unitized by a snap ring, the seals are can be disassembled and repaired on site. The ASP type 8 meets ASTM F1511 and for most applications are a direct replacement to original equipment seals. Operating

Conditions: Pressures up to 350 psig,

Speed up to 5000 fpm, Temperatures: -20 F to +400 F.

*Unless specified the seals are provided with: CNFJ Grade CARBON Face, VITON o-rings. Stainless Steel Bodies
