Multiple Spring Mechanical Seals

Mechanical Seals for Pump shafts provide the best possible seal for a rotating shaft. These extremely durable designs have been sealing pumps for decades.

When ordering your seal, do not forget to order the stationary seat to go with it.

ASP Type 9 Seals

Our ASP Type 9's are durable seals made to perform in most types of rotary shaft equipment. Their design features a reliable Teflon® wedge secondary seal ideal for a wide range of services from chemical to food, hydrocarbons to acids, etc. These seals have a set screw to provide a positive connection between seal and shaft. Unitized by a snap ring, the seals can be disassembled and repaired on site. The ASP type 9 meets ASTM F1511 and for most applications are a direct replacement to original equipment seals. Operating Conditions: Pressures up to 350 psig, Speed up to 5000 fpm, Temperatures: -20 F to +400 F.
 *Unless specified the seals are provided with: CNFJ Grade CARBON Face, Teflon® o-rings. Stainless Steel Bodies
